MAD EDITION

AI ISN'T MAGIC.

It's learning patterns

DATA → INTELLIGENCE

MAD EDITION

Most people think AI:

- Always gives correct answers
- Understands everything like humans
- Knows facts without learning

Reality: AI predicts patterns, not truth.

Why AI Gets It Wrong?

Your AI isn't always right. It can make mistakes because of:

- Inaccurate or incomplete data
- Misunderstood prompts
- Missing context
- Patterns that lead to wrong answers

Result: Sounds right. Can be wrong.

The Smart Way to Use AI

AI works best when you know how to guide it:

- Give clear instructions
- Add relevant context
- Specify the format you need
- Review and verify the output

Better prompts. Better results.
